

KAUNG SI THU

DATA ANALYST | BI ANALYST | SQL & TABLEAU

+60 178742670 | [linkedin.com/in/kaung-si-thu01](https://www.linkedin.com/in/kaung-si-thu01) | kaungsithu.sallius@gmail.com

SUMMARY

Data Analyst with a Master of Data Science from Universiti Teknologi Malaysia and proven experience turning complex datasets into clear, actionable business insights. Skilled in SQL, Python, Tableau, and Excel with a strong track record of building dashboards, predictive models, and data pipelines across real-world domains including real estate, supply chain, and tourism. Passionate about helping businesses make faster, smarter decisions through data.

TECHNICAL SKILLS

Core Analytics: SQL (PostgreSQL, MySQL), Python (Pandas, NumPy), Excel (PivotTables, Advanced Formulas)

Visualization: Tableau, Plotly Dash, Streamlit

ML & Modeling: Scikit-learn, XGBoost, TF-IDF, Feature Engineering

Tools & Cloud: Git, Docker, GCP, MLflow, FastAPI

PROJECTS

HDB Resale Price Prediction - Singapore

Python · XGBoost · OneMap API · Plotly Dash · 100k+ rows

- Cleaned and engineered features from 100,000+ transaction records, integrating geospatial data via OneMap API
- Built XGBoost model achieving $R^2 = 0.97$, providing reliable price estimates for buyers and sellers
- Deployed interactive Plotly Dash dashboard for real-time price prediction based on user-selected flat attributes

Unemployment Analysis & Prediction - India & Pakistan

Python · Random Forest · XGBoost · Plotly Dash · Team Leader

- Led analysis of multi-country unemployment records, uncovering macroeconomic trends and regional disparities
- Built ensemble models achieving 90%+ accuracy to support policy-focused forecasting
- Delivered findings via interactive Plotly dashboards to academic stakeholders

QueryMate - NL-to-SQL Assistant

LangChain · Gemini 1.5 Flash · ChromaDB · PostgreSQL

- Built a natural language interface that lets non-technical users query databases without writing SQL
- Designed schema-aware RAG pipeline reducing query errors significantly

Forecasting Tourism Demand - Singapore

Python · XGBoost · Random Forest · Plotly Dash

- Integrated historical arrivals, weather, and events data to model demand fluctuations
- Achieved RMSE < 10%; dashboard used for proactive staffing and resource planning recommendations

WORK EXPERIENCE

Data-Driven Web Development Intern | Fireclash Enterprises, India

May - Dec 2024

- Designed relational DB schema for hospital records, reducing data retrieval time by 40%
- Analyzed user behavior data to drive UI/UX improvements across a medical web application
- Delivered 3 major feature updates collaborating across development and analytics teams using Agile and Git

Technical Project Lead | Take Your Time (Nonprofit), Myanmar

Feb 2021–Dec 2022

- Analyzed 100+ user feedback entries to define data needs and architecture for a nonprofit education platform.
- Led team of 3 using Agile; delivered platform features achieving 30% increase in user engagement

EDUCATION

Master in Data Science - Universiti Teknologi Malaysia

Oct 2025–Expected Sep 2026

- Research focus: Interpretable ML (XAI) for Dynamic Pricing in E-Commerce

B.Tech in Information Technology - Marwadi University, India

Jun 2021–Apr 2025

Certifications - Google Data Analytics Professional Certificate, DataCamp Data Scientist Professional Certificate
