

# KAUNG SI THU

## JUNIOR DATA SCIENTIST | ML ENGINEER | MLOPS

+60 178742670 | [linkedin.com/in/kaung-si-thu01](https://www.linkedin.com/in/kaung-si-thu01) | [kaungsithu.sallius@gmail.com](mailto:kaungsithu.sallius@gmail.com)

### SUMMARY

Results-driven Data Scientist with a Master of Data Science from Universiti Teknologi Malaysia and hands-on experience building and deploying end-to-end ML pipelines, RAG-based AI applications, and MLOps workflows in cloud environments. Proficient in Python, XGBoost, LangChain, FastAPI, Docker, and GCP. Passionate about shipping production-ready models that solve real business problems.

### TECHNICAL SKILLS

**Programming & ML:** Python (Pandas, NumPy, Scikit-learn), Machine Learning, RAG Pipeline

**MLOps & Cloud:** MLflow, FastAPI, Docker, GCP Cloud Run, Hugging Face, Streamlit

**Data & Databases:** SQL (PostgreSQL, MySQL), Data Modeling, Feature Engineering

**Visualization & Tools:** Tableau, Excel (Advanced, PivotTables), Git, Docker

### PROJECTS

#### LogiRisk AI - MLOps Supply Chain Risk Auditor

XGBoost · MLflow · FastAPI · Docker · GCP Cloud Run · Streamlit · Hugging Face

- Trained XGBoost classifier for supply chain disruption risk with MLflow experiment tracking and model versioning
- Containerized with Docker, deployed FastAPI backend to GCP Cloud Run, Streamlit frontend on Hugging Face
- Delivered a production-grade MLOps pipeline with automated retraining hooks end-to-end

#### QueryMate - RAG-Powered NL-to-SQL Assistant

LangChain · Gemini 1.5 Flash · ChromaDB · PostgreSQL · Supabase · Streamlit

- Built a natural language-to-SQL assistant using LangChain + Gemini 1.5 Flash for non-technical database querying
- Implemented schema-aware RAG pipeline with ChromaDB, significantly reducing SQL hallucinations
- Deployed on Streamlit with Supabase/PostgreSQL backend; published full architecture breakdown on Medium

#### Resume ATS Checker

NLP · TF-IDF · Cosine Similarity · Streamlit

- Built NLP tool scoring resume-to-JD alignment via TF-IDF + cosine similarity with keyword gap analysis
- Implemented schema-aware RAG pipeline with ChromaDB, significantly reducing SQL hallucinations
- Deployed as interactive Streamlit app with actionable improvement suggestions

#### HDB Resale Price Prediction - Singapore

XGBoost · OneMap API · Plotly Dash · 100k+ rows

- Engineered geospatial features via OneMap API; built XGBoost model achieving  $R^2 = 0.97$
- Deployed interactive Plotly Dash app for real-time price prediction

### WORK EXPERIENCE

#### Data-Driven Web Development Intern | Fireclash Enterprises, India

May - Dec 2024

- Designed relational DB schema for hospital records, reducing data retrieval time by 40%
- Analyzed user behavior data to drive UI/UX improvements across a medical web application

#### Technical Project Lead | Take Your Time (Nonprofit), Myanmar

Feb 2021–Dec 2022

- Analyzed 100+ user feedback entries to define data needs and architecture for a nonprofit education platform.
- Led team of 3 using Agile; delivered platform features achieving 30% increase in user engagement

### EDUCATION

#### Master in Data Science - Universiti Teknologi Malaysia

Oct 2025–Expected Sep 2026

- Research focus: Interpretable ML (XAI) for Dynamic Pricing in E-Commerce

#### B.Tech in Information Technology - Marwadi University, India

Jun 2021–Apr 2025

**Certifications** - Google Data Analytics Professional Certificate, DataCamp Data Scientist Professional Certificate
